

Authors note: Districts will offer only either the Traditional Pathway Algebra I/Geometry/Algebra II or the Integrated Pathway (Mathematics I-III) such that for grades 9 and 10, there is only one pathway

701 High schools are free to organize their mathematics pathways in different ways. Figure  
 702 8.4 below indicates possible pathways for high school coursework, reflecting a common  
 703 ninth- and tenth-grade experience, and a broader array of options in eleventh and  
 704 twelfth grade. High schools will typically offer either the Integrated or Traditional

# Passage of the Math Course Sequence Policy
